

Partner for Nautica

Mobile bilge pump units on trolley for black and gray water

Partner 2r and 3 r

PARTNER are bilge pumps on trolley for the suction and collection of fluids and sewage of various origins, specially designed for practical and simple use within port facilities, docks, marinas, community facilities such as campsites, tourist villages or areas occasional equipped for parties or sporting events. PARTNER can quickly suck up and transfer or store clean fluids or with suspensions of acidic or basic nature, with abrasive suspensions, light or heavy oils, diesel, bilge water, gray, white, black, dense and viscous fluids in its tank. PARTNER is insensitive to dry running, is self-priming up to at a depth of 9 meters and is capable of sucking up a liquid even tens of meters from the point of collection. These characteristics make it particularly suitable for the suction of black and cloacal waters of various kinds from boats and boats, campsites and tourist villages not served by urbanization. Full compatibility with sea water also makes it suitable for the drainage of bilge fluids contaminated with oils or fuels, even with a significant presence of sand. The ability to treat viscous fluids allows PARTNER mobile bilge pumps to suck sludge or effluent from the washing of dry docking and repair sites, garages, fuel tanks. The ease of use of PARTNER facilitates its use even by personnel who are not at all or inexperienced.

Partner is mainly produced in two sizes that reflect functionality and compactness suitable for most of the needs of the sites of use, special versions, with different types of pumps and tanks of different capacities are made on request.

Data and features:

Type	Pump type	Flow	Voltage	Tank	Towing System
Partner 2 R-2.5	HCP 2.5	1300 l/h	Mono-Three phase	250 liters	2 wheels and tow hook
Partner 2 R-3.5	HCP 3.5	3000 l/h	Mono-Three phase	250 liters	2 wheels and tow hook
Partner 3 R-2.5	HCP 2.5	1300 l/h	Mono-Three phase	120 liters	3-wheel manual towing
Partner 3 R-3.5	HCP 3.5	3000 l/h	Mono-Three phase	120 liters	3-wheel manual towing

Partner TROLLEY portable bilge water unit

The most compact and light device with the smallest trolley in the family of devices for the suction of black and gray water from boats and boats. The small size and ease of use, combined with a very large tank, allow you to have a machine that can be carried and used anywhere, even in the smallest spaces. Trolley is the ideal system for small marinas.

Type	Pump type	Flow	Voltage	Tank	Towing System
Partner trolley STF 3	HCP 20	750 l/h	Mono	65 – 100 liters	Manual
